

Don't upset your offset

If you run a small or large business, you're probably working long hours with little time to plan ahead. Managing your risks is key, so that you can save time and money, and get back on your feet quickly should the unexpected happen.

As the endorsed broker for Printing Industries Association of Australia, we understand that your business may have a number of unique qualities that require something tailored to the way you do business.

How? By thinking smart.

Having helped over 100,000 small and medium sized Australian businesses, we have used our knowledge and experience to develop a smart solution for any business owner looking for an insurance solution that takes care of the finer details while you take care of running your business.

We help find proactive protection for emerging risks in your industry. With the changing landscape in printing, you may be exposed to new unprotected risks such as:

- Advice relating to graphic design
- Professional exposures attaching to software development / online platforms and/or online ordering capabilities
- Cyber risk
- Machinery breakdown for your printing equipment

All of which are risks that may not be included under traditional generic insurance protection.
